

| A250 Fully Automatic Compact Coffee Machine |

Designed for Small Offices

Precise Temperature Control for More Stable Taste

Compact Size, Great Performance

Flexible Water Supply & Free Placement

Dual Cups Simultaneously, No Waiting for Refills

A250

The A250 office coffee machine adopts dual-core heating with independent temperature control to ensure coffee taste; large-capacity components reduce cleaning frequency to meet the daily use of small offices; the dual water inlet mode of water tank and water pipe flexibly adapts to different venues; it supports one-touch preparation of 34 beverages and is equipped with a cold brew function, meeting the needs of office scenarios.

Precise Temperature Control for More Stable Taste

Equipped with dual heating drive, the extraction water temperature and steam temperature are maintained within the ideal range, ensuring each cup achieves an excellent balance of "golden extraction and dense milk foam".

Flexible Water Supply & Free Placement

It can be connected to direct drinking water or purified water buckets, ensuring non-stop refills for frequent users and eliminating the hassle of refilling water. In water tank mode, it can be freely moved to temporary locations and placed wherever needed.

Dual Cups Simultaneously, No Waiting for Refills

With one-click dual-cup output, it produces two cups simultaneously in 45 seconds, saying goodbye to the frustrating daily experience of "waiting for one cup after another" and easily coping with morning peaks and meeting breaks.

Features

One-touch milk coffee	●
Cold brew coffee	●
Room temperature milk foam	●
Automatic cleaning of milk circuit	●
TFT LCD full lamination screen	●
Water tank water inlet	●
Bucket water inlet	○
Pressurized automatic water inlet	○
IoT mobile payment	○

Technical sheet

Bean hopper capacity (g)	250
Water tank (L)	2
Grounds box capacity (g)	300
Water retention plate capacity (ml)	800
Display size (horizontal)	7"
Rated voltage (V)	220-240
Rated frequency (Hz)	50
Rated power (W)	1450
Machine weight (kg)	13.5
Machine D*W*H (cm)	26.6*48.1*44.7

Capacity

Recommended daily output (cups)	30
Preset drink types	34
